

AI Day: Future of Engineering - between AI and Sustainability

Thursday, 23 November | 2 pm to 4.30 pm | Digital conference about Microsoft Teams

'AI Day' is a digital event that highlights the synergies between sustainability, engineering and the latest technology trends under the motto 'Future of Engineering - between AI and Sustainability'. it's OWL is organising 'AI Day' for the third time with **prostep ivip e.V.** on 23 November from 2 pm to 4.30 pm. The 'AI Day' brings together experts from the fields of sustainability, engineering and technology to exchange ideas and drive innovation. Get an insight into the new **Industrie.Zero** strategy from it's OWL and learn more about topics such as **sustainability in engineering** und **circular economy in product creation** and intelligent engineering. The event will be held in English.
